Child protection plan

1. Purpose

Child protection is the task of every provider and of everyone who works with children in the provider's care. This plan says how the provider prevents harm, notices it and acts on it.

2. Prevention

Every new member of staff presents an extended criminal record certificate before the first day of work, and again every five years. All staff take part in a training on child protection once a year.

3. Noticing harm

Staff write down what they observe, with the date and the time, and tell the designated child protection lead on the same day.

4. Acting on a suspicion

A suspected case is reported to the youth office within one day.

The report names the facts observed and the steps taken.

The lead informs the parents unless this would put the child at risk.
